

| Department: Accounting | Program: MBA | | |
|--|-----------------------|--|--|
| Course Name: Financial and Managerial Accounting | Course Code: ACCT 601 | | |
| Pre-requisite: Not Applicable | Credit Hours: 3 | | |

Brief Description

This course teaches students how to demonstrate the financial accounting framework, the accounting cycle, how to prepare and analyze financial statements, and how to extract and modify costs in order to make informed managerial decisions. In addition, the course provides an overview of theoretical and practical managerial accounting information. Planning is covered through important topics such as job order cost systems and overhead allocations, process costing, operational budgeting, standard cost systems and cost-volume-profit analysis.

Course Objectives

After completion of this course the student will be able to:

- Discuss the financial accounting framework and the accounting cycle.
- Illustrate how to prepare and analyze financial statements.
- Describe concepts and tools of managerial accounting needed in all the different managerial levels in an organization.
- Analyze and interpret both historical (real) and future (predicted) data used by management to conduct daily operations and plan future operations.
- ▶ Demonstrate improvement in oral communication skills through class involvement.
- ▶ Participate actively and effectively in critical thinking in order to deal with developing future rational decisions

Course Learning Outcomes

- Distinguish between concepts, principles, and theories of accounting
- Apply the concepts, principles, and theories in different accounting situations
- Demonstrate written communication skills
- Have scientific research skills in the field of accounting
- Have the skills of critical thinking and analyse accounting situations
